

TEO BEI KUAN

Hello, I am Bei Kuan. I'm a Robotics and Mechatronics diploma holder with practical experience in hands-on engineering work and 3D modelling.

I work with software like Autodesk Inventor and Solidworks. I care deeply about part tolerance, making the design as material efficient as possible, improving designs based on prototypes, and ease of assembly and repair. My approach: measure accurately, brainstorm quickly, and come up with quality prototypes.
